KESHAV DUBEY

SENIOR SOFTWARE DEVELOPER

keshavdubey1203@gmail.com | 9651591360 | Noida, UP | LinkedIn

PROFESSIONAL SUMMARY

Senior Software Developer with 3.8 years of experience delivering enterprise web applications, REST APIs, workflow automation, and analytics solutions. Strong in C#, .NET Core/ASP.NET MVC, Angular, SQL Server, and Azure DevOps, with hands-on experience in Power BI Embedded, approval workflows, centralized email services, and SQL performance tuning. Combines full-stack development with cloud deployment, secure access control, production troubleshooting, and cross-functional delivery.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, Java, SQL/T-SQL

.NET & Backend: .NET Core, ASP.NET Core Web API, ASP.NET MVC, ASP.NET Web Forms, Node.js, REST APIs

Frontend: Angular, React.js, HTML5, CSS3, Bootstrap

Databases & Analytics: SQL Server, Stored Procedures, Query Tuning, Oracle, MongoDB, EF Core, LINQ, ADO.NET, Power BI Embedded, DAX

Azure & Integration: Azure AD, Azure DevOps/Pipelines, Azure Functions, Azure Service Bus, Blob Storage, App Service, Azure SQL, Redis Cache, AKS

DevOps & Architecture: CI/CD, Docker, Kubernetes, Microservices, Event-Driven Architecture, Git/GitHub

Security & Tools: JWT, Role-Based Access, Visual Studio, VS Code, Swagger, Postman, SSMS, Jira, Debugging, Production Support

PROFESSIONAL EXPERIENCE

Senior Software Developer | May 2025 – Present

ChipSoft Solutions Pvt. Ltd | Noida, India

- Developed and maintained enterprise web applications and REST APIs using C#, .NET Core, ASP.NET MVC/Web Forms, Node.js, Angular, and SQL Server across reporting, finance, and approval workflows.
- Embedded and supported Power BI dashboards using Azure AD authentication, embed tokens, and role-based access; maintained Member Engagement datasets and SQL reporting for events, committees, online services, help desk, and contact engagement.
- Enhanced the CII Centralized Mail Service with email API/SMTP integrations, provider fallback handling, Redis-based service-availability flags, operation logging, and attachment processing.
- Supported BTS bill-tracking and approval workflows by improving stored-procedure-backed lists, pagination, employee/region filters, HOD queues, bill-status reporting, and SQL query troubleshooting.
- Maintained Purchase Requisition workflows for submission, resubmission, withdrawal, approver routing, pending-approval counts, and automated approval notifications through the centralized mail service.
- Improved Redemption analytics for points allocated, points redeemed, non-redeemed members, and event redemptions, including organization/year/region filters and exportable reports.
- Supported Azure DevOps CI/CD, Azure Functions, Service Bus, Blob Storage, Redis Cache, and AKS/container deployments; performed code reviews, performance tuning, debugging, and production support.

Software Developer | Jan 2023 – April 2025

Team E-Logisol Pvt. Ltd | New Delhi, India

College Management System and Logistics & Terminal Management System (ERP + CRM)

- Developed college-management modules using VB.NET, C#, ASP.NET MVC, SQL Server, and Oracle (TOAD) to manage student records, finance-related information, and administrative reports.
- Developed ERP + CRM workflows for container and wagon tracking, recording movement/status details and supporting inbound and outbound terminal operations.
- Implemented documentation and Goods Receipt Note (GRN) generation workflows, and integrated payment gateways and REST APIs to support transaction processing and application-to-application communication.

Web Application Development (HTPL, ACTL)

- Delivered HTPL/ACTL web application features using React.js, C#, .NET Core, Node.js, and SQL Server for registration, authentication, data management, and API-driven workflows; supported frontend/backend integration and Azure DevOps CI/CD build and release pipelines.
- Integrated React.js interfaces with backend REST APIs, handling request/response data and aligning UI behavior with server-side processing and SQL Server operations.
- Supported feature testing, issue analysis, and fixes across application layers; helped validate Azure DevOps builds and release pipelines before deployment.

PROJECTS

KeshAm HRIS (HRMS) – Human Resource Information System | Personal Project

Technologies: Angular, ASP.NET Core Web API, C#, Entity Framework Core, LINQ, SQL Server, JWT, REST APIs, MailKit/SMTP, ClosedXML, HTML5, CSS3

- Designed a full-stack HRIS using Angular, ASP.NET Core Web API, C#, EF Core, LINQ, SQL Server, and REST APIs, organized into API, Application, Domain, Infrastructure, and Persistence layers.
- Implemented JWT-based authentication, password-related workflows, and role-based authorization for Admin, HR, Manager, and Employee users.
- Developed core HR modules for employee records, departments/designations, attendance, leave requests and approvals, holidays, user/role administration, dashboards, and reports.
- Automated onboarding through linked user-account creation, Employee-role assignment, and welcome emails using MailKit/SMTP; added employee self-service for profile, attendance, and leave records.
- Built responsive Angular forms and tables with CRUD operations, search/filtering, and validation; implemented DTO-based API request validation/error handling and role-authorized Excel exports using ClosedXML.

KeshAm Profiles – Personal Developer Portfolio | Personal Project

Technologies: Angular, ASP.NET Core Web API, C#, ADO.NET, SQL Server, REST APIs, TypeScript, HTML5, CSS3

- Built a responsive, shareable Angular developer portfolio presenting a professional profile, summary, skills, projects, resume, and contact/social links.
- Integrated ASP.NET Core Web API endpoints with ADO.NET and SQL Server for data-driven portfolio content; added resume preview/download and configurable GitHub, LinkedIn, and Naukri links, organized profile/skills/projects/contact sections, and managed source code with Git/GitHub.

INTERNSHIP

Android Development (Service and Maintenance) | Jun 2022 – Aug 2022

Hindustan Aeronautics Limited | Kanpur, India

- Developed an Android service/maintenance application using Java, XML, Android Studio, and SQL, integrating backend logic for reliable workflows.

EDUCATION

Bachelor of Technology in Computer Science & Engineering | 2019 – 2023

Kanpur Institute of Technology, Kanpur, UP

Certification: E&ICT Academy, IIT Kanpur | Issued Mar 2021 | Credential ID: 26021-95864-74708-feff95e3a60-2021
